

Previously you told us:

“face to face provider forums are better opportunities to build relationships and network”

“hospital discharges are difficult and are causing a lot of stress for staff and our clients”

What have we done

- A working group has been established to enhance the hospital discharge experience.
- We've created an inbox to collect feedback and gain insights into the challenges.
- We are planning a workshop to brainstorm and develop potential solutions
- We will develop a clear plan to improve patient's and care providers experience of discharge
