

Overview

Essex Care Search

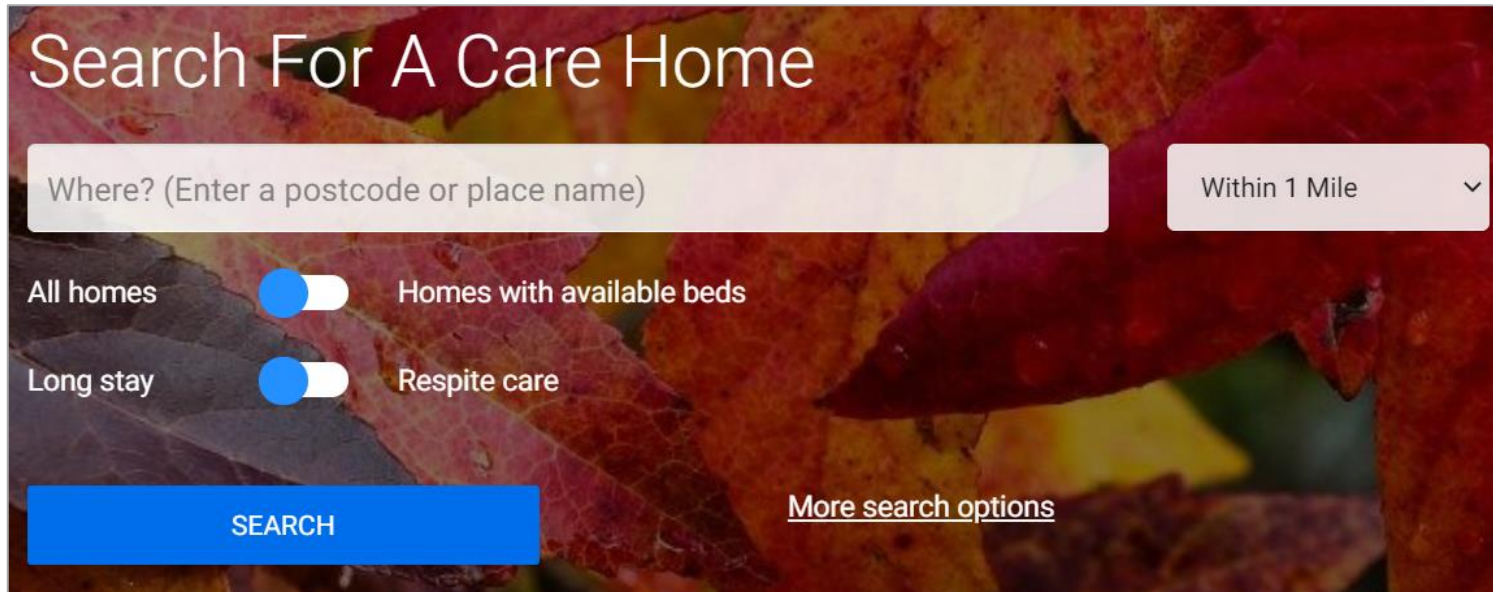

April 2021

Essex Care Search

Essex Care Search is a free secure online bed management tool with a search facility for people looking for bed vacancies in residential and nursing care homes primarily in Essex. Think of Essex Care Search as Booking.com for care home bed vacancies.

Search For A Care Home

Where? (Enter a postcode or place name) Within 1 Mile

All homes Homes with available beds

Long stay Respite care

[More search options](#)

How Essex Care Search Works

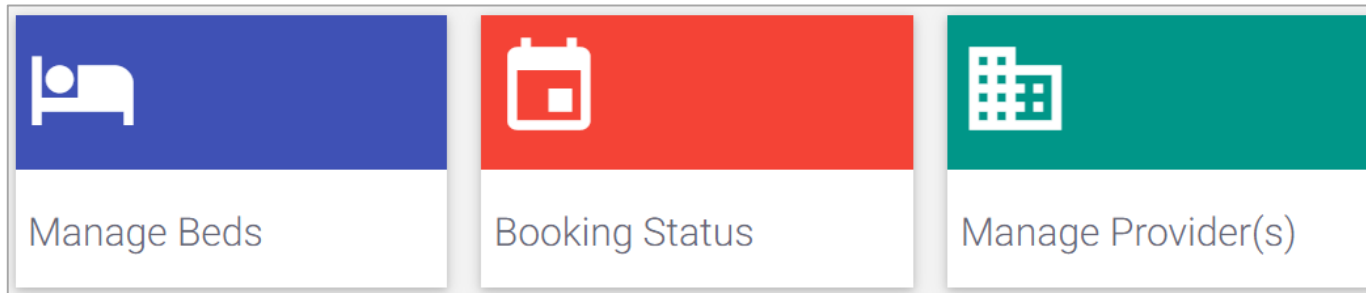

Residential and nursing home providers enter information about their home including:

- the types of care offered
- the facilities and services in the home e.g. pets allowed
- vacant room / bed details e.g. if the room has an ensuite
- photos of the home

People and organisations looking for a care bed can use the search function to enter a search criteria allowing them to view care homes and available bedrooms which meet their requirements.

Booking requests from Essex County Council and Health Partners can be made directly through Essex Care Search and notifications of booking requests are sent electronically to the care home provider.

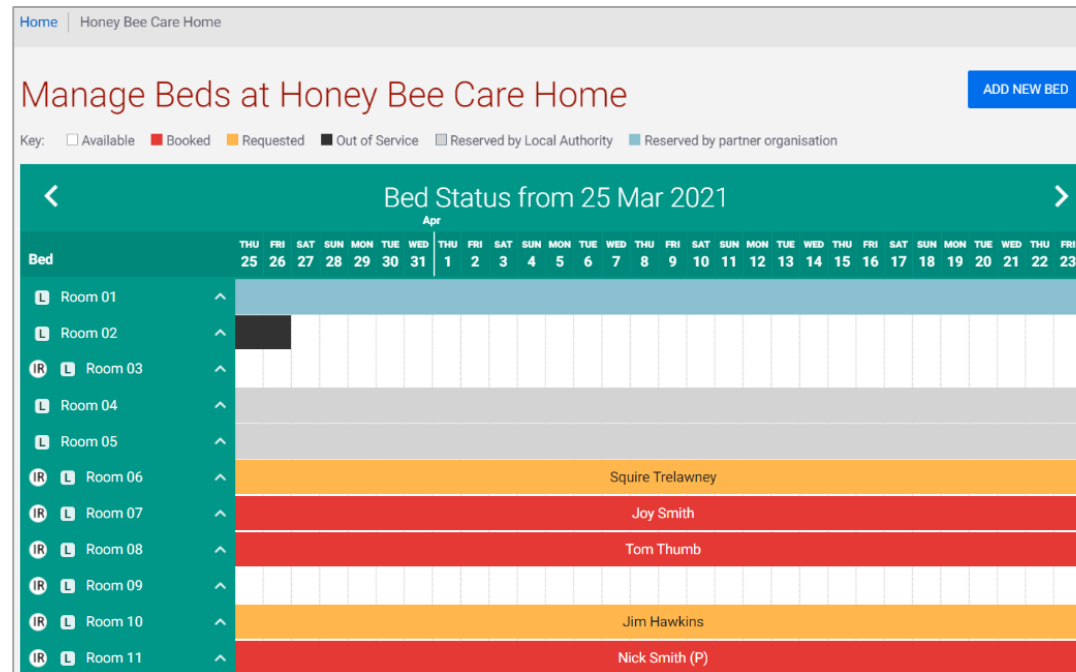

Why use Essex Care Search?

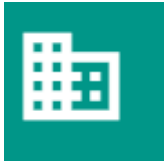

Using Essex Care Search provides several benefits to residential and nursing home providers, including:

- increased visibility of your home to people searching for care home beds
- free advertising to members of the public from June 2021
- a free tool to assist with managing and tracking bed occupancy
- enables the tracking of booking requests from Essex County Council and Health Partners

Provider Information

Providers enter information about their residential or nursing home in Essex Care Search.

Details include:

- The types of accommodation offered
- Facilities near and within the care home
- Client groups catered for
- The types of bedrooms
- Photos of the care home
- Contact details
- A link to your home's website

Bedroom Information

Providers enter or update information and the features for each of their bedrooms in Essex Care Search.

Details include:

- Type of bedroom
- Features available in the room
- Contract type accepted for each room
- Price band

Providers have the option to suspend an unoccupied bedroom for any reason, for example when the room is being redecorated.

Providers will also be able to use the system to manage beds and book self-funding service users into non-contracted beds.

Manage User Access

Providers can select different user permission levels for Essex Care Search, allowing a choice over what areas of the system care home staff can access.

Role	Summary of Role Permissions
Provider Administrator	Users with this role have the highest available permission level. Administrators have full access to the system, including the ability to add new users and manage provider details. In addition, users with this role can manage the beds within Essex Care Search, accept and reject booking requests, and add a private client to a room.
Provider Manager	Users with this role can manage the beds within Essex Care Search, accept and reject booking requests, and add a private client to a room. They cannot add new users or manage provider details.
Provider Viewer	Users with this role can only view the beds and room occupancy. They cannot add new users, manage provider details, accept, and reject booking requests, or add a private client to a room.

Searching for Vacancies

Essex Care Search allows people to search for vacant beds in residential or nursing homes using either a high-level search or a detailed search by entering additional search criteria.

A screenshot of a web form titled "Search For A Care Home". The form is set against a background of autumn leaves. It includes a search bar for location, a radius dropdown set to "Within 1 Mile", and two toggle switches for "All homes" and "Long stay", both of which are turned on. Below these are input fields for "Home Name" and "Home type" (set to "All"). There are three dropdown menus for "Gender" (set to "Any"), "Room Type" (set to "select..."), and "Price Band" (set to "select..."). A section titled "Type of care" contains eight checkboxes for various conditions: Aspergers, Autism, Dementia, Learning Disability, Mental Health, Older People (over 65), Physical Disability, and Sensory Needs. A "Facilities" section contains eight checkboxes: Alcohol Dependency, Bed Rails, Community Rehabilitation, Complex Care Needs, Dementia, Drug Dependency, Ensuite, and Ground Floor. A final row of checkboxes includes Hoist Tracking, Non Smoking, and Plus Size. At the bottom, there is a blue "SEARCH" button and a link for "Simple search".

Search Results – Care Homes

Once a search has been carried out, Essex Care Search will display the Care Homes with vacancies that meet the defined search criteria.

The screenshot shows a web interface for search results. On the left is a 'Filter Results' sidebar with sections for 'Radius' (set to 'Within 15 Miles'), 'CQC Rating' (set to 'Good'), 'Care Categories' (Dementia, Mental Health, Older People), and 'Care Home Features' (A bar / cafe, special diets, smoking area, etc.). The main area is titled 'Search Results' and shows 'Showing All homes with long stay beds within 15 miles of Chelmsford, UK.' It lists 7 care homes, with the first three visible: Rose Tree Care Home (2 vacancies), White Horse View Care Home (2 vacancies), and Honey Bee Care Home (13 vacancies, Mental Health category). Each listing includes a photo, name, address, distance, phone number, CQC rating, and links for 'Show vacancy details' and 'View care home details'.

Search Results – Available Bedrooms

Essex County Council and Health Partner Users will request vacant beds through the system.

From Summer 2021, members of the public will be able to use Essex Care Search to search for care and nursing home information.
