Promoting Safer Provision
of care for Elderly Residents

Our Smart Aim at

Is to...

Our AIM is SMART! This means it is **S**pecific so everyone knows what we are trying to achieve, **M**easurable to see if what we are doing is working and although our aim should be stretching it needs to be **A**chievable and **R**ealistic. Finally our aim should be **T**ime bound, setting ourselves a goal date to work towards.
