

Training to help individuals or organisations better meet the needs of people with sight and /or hearing loss.

Sensory Training

www.ecl.org/sensory

Over 20 million people in the UK have a sight loss and/or hearing loss.

ECL is leading the way in making businesses and organisations more sensory aware. Our team of sensory specialists deliver courses to highlight how sensory loss impacts individuals, and outlines how to make the world more accessible for people who are partially sighted, blind, hard of hearing, deaf or deafblind.

No matter where you work, you will inevitably interact with people who have sensory loss.

During the summer, ECL came to deliver Sensory Training for us. We have become Sensory Champions and have gained more knowledge and experience in what we are providing for our residents. The training has really helped immensely, and we have implemented several changes to improve activities for those staying with us who are hard of hearing or have sight loss.

Sue Smith,
House Manager of Cherry Wood
Care Home in Chelmsford.

Sensory courses:

Sensory Champion Training (CPD Accredited)

- Leave the course with an understanding of sight and hearing loss.
- Learn how your business or organisation can make changes to become more accessible.
- Hints and tips on how to communicate more effectively to prevent barriers and isolation.
- Find out about technology and equipment available to enable independence.
- Learn first-hand from people experiencing sight and/or hearing loss.
- Leave the course with 4 CPD accredited points.

Sighted Guide and Communication Course

- Leave the course with an understanding of sight impairments.
- Experience vision loss through simulation.
- Become confident in how to guide people safely.
- Hints and tips on how to communicate more effectively to prevent barriers and isolation.
- Find out about technology and equipment available to enable independence.

Tailored Sensory Awareness Training

- Customised courses to meet the requirements of your business or organisation.

A very informative training session, it really opened my eyes to how having a sensory impairment can impact day to day living situations.
